Thread: [\[Free\]Earn Money With Google Map, Premium Method By CyberError](#)

**CyberError** - February 19, 2020, 7:52 pm

Hey, CyberError Here here with another method, as always my methods are serious and will give you real-life lessons/skills which help you further in the future , if you aim to become a millionaire by some magical methods then you're at the wrong place, here you have to work to earn some \$ , yeh I can agree that this method doesn't suit everyone, but you should try it once

## Earn Money Using Google Maps

That's a very easy way to earn some big money. It all about how much effort your are willing to put in.

First , We need to find customer for our service. Open google and search "Car Repair in luton" or something like this. A good thumb of rule is to type a location name that is not too famous or crowded and choose a business that is own by individual owner So, no no to Food Chains.

Second, Now Google will show various listing on its map for the particular location you have entered

like in our case it is luxton. Now, What we gotta do is to find a listing which is not claimed by the business owner. To find unclaimed listings we will look at couples of things like if the listing has a website or not, photos or not or the number of rating are high or low. usually un claimed business dont have website in added and the number of reviews are generally low.

Third, Now once you find a unclaimed business you have to contact them and pitch your service. There are two ways to do that one is through call and second is through the email. Call is a better way to contact coz it shows the authentication and trust. It makes actual human to human intrecation unlike email which is like talking to machine or worse maybe a scammer. And for the most cases you will find mobile number more easily then the email for the uncalimed business, So in that case call is your only option.

4) Now, making the call. Before calling someone to sell your service keep in your mind that you are not taking money from them you are giving them the value and profit. You just have to show them how valuable your service is. Look at the bellow example of a conversation to learn to from it.

O id for the Owner and S id for the Seller.

O: Hello, We are blah balh blah.S: Hello, Sir/Mam. I come across you blah blah blah thorough google map. I want to contact you

through email but there wasn't any email on that , I tries to visit the website but there wasn't a website either.And Reviews seems not very good.

O:So, What.. Di you call to complain?

S: Don't get me wrong But If I was actauall a customer what do you think my chances are of visitng your shop instead of one of your competetior. I am here to help, But I can only help if you understand the problem.

O: Umm, Yeah not very much I guess.

S: Exactly sir, Do you know 1 in the 3 person Do a google search before visitng any store.That means

most of your potential customer are going to the other shop just becuase they have put a little effort

on their online persence. I am a digital marketter and will help you to make your online peresence better at very reasonable rate.

O: Okah, What are the rates

S: For the starter, You need to claim your business on google map which would be 25 \$. Then we can

follow on for more steps. If you will give me your business email I will forward you the entire fee chart. You can decide What you want for your online presence.

O: okah, here is the email .....@.....com.

S: Thank you sir, If You say should I start the claimming process becuase it would take some time to verify.

O: Yeah, sure sooner the better.

S: Thanks you sir. I will send you the mail in few and we can proceed from there. Good Day.

O: thanks you too.

Now, This is a mock conversation. Your conversation might not go so smooth. Some business owners are stubborn and focus on old ways of business while other are quick to adapt but always spectical. So, This is something you have to work on. But the thing is here we are providing them a win-win situation it is stupidity if they don't want it. In this day and age where online presence is as important as physical presence if not more, Not having a online presence is begging for loss.

5)Now, on the email you have to send this rate chart (feel free to change it accordingly)

Claim business -25\$

add photos - 15\$

add reviews -15 \$

Create and Set Up Website - 250\$

SEO ranking- 150\$/month.Note- For adding the photos you don't have to go there and click those photos. You can directly ask

the owner for photos (Everyone got good camera phone these days) and can also use free stock photos if its some generic items like food images for a local restaurant.

6) Now once you got the job, Start doing it. <https://www.oberlo.in/blog/google-my-business> Here is the link to do it all.

This method actually works, you just need to be confident and have that salesperson attitude.

**Royh Ax** - February 26, 2020, 4:21 pm

anyone tryna do this together on discord? im a fucking simp when it comes to this even though im confident IRL

edit: my discord is

THANKS GUYS , KEEP THIS THREAD ALIVE

**Renestey** - March 3, 2020, 8:41 am

Great idea my man, I have already been brainstorming a little about this after reading it a few days ago. I think I might give it a try with some small local businesses and hopefully upsell them to website design!

keep this thread alive guys

**Instag** - March 19, 2020, 9:00 am

Old Method shared on other forums too and one more thing it can't work on Asian countries very well.

**money guts** - March 19, 2020, 9:03 am

Ah yeah saw this on a youtube video

**bylbyl2218** - April 10, 2020, 6:07 pm

I will keep this short and sweet, logic idea, smart inventor and that vision that real business men have.

My congratulations!

**bh\_boite** - April 11, 2020, 6:56 am

Easier said than done mate .. seo is not that easy lot of hard work if you are lucky to rank. You are seeking free traffic to yr sig link thats all. To earn money you need a skill period.

**shitmaster** - April 12, 2020, 4:08 pm

This method is interesting. Thanks for sharing it with everyone. Advantage here is that this could be conducted by everyone from every corner of the world. Fascinating! Thanks again CyberError !

Map SEO is a different game to organic search SEO and much easier - The OP mentioned to look in smaller towns and cities so competition will be less.

Sometimes by just having a more complete GMB profile is enough to outrank the competition in smaller locations.

These are some of the things G looks at for GMB ranking:  
NAP citations

Online reviews

100% Fully completed profile

Relevant content posts

Good quality photo's

Completed Q&A section

I've been offering GMB optimization as a service for a while and I have a cool review app that I sell my clients for a monthly residual income ?

**SaintJimmy** - April 13, 2020, 9:23 am

I just came across this. Seems like a very interesting idea. I'll go ahead and try it later.

**Ivex** - April 14, 2020, 7:52 am

Yeah I want to do this but for social media marketing.

Might just go put that on that guide you're selling on how to make reddit tts videos for \$1k to make the joke funnier lol.

OT: Yes this does work people, put your own twists in it in regard to the pitching part, scale it and you're good to go. If a place declines, go try with all its competitors.
