So i'm reading through the [Help Docs](#) and I notice the disallowed blackhat activity is a little thin.

It appears that the server stress testing header was removed?

¿Que es?

Hmm I could of swore it was taken out at one point, but maybe it could of been added back.

Why are you reading the Docs, you don't know the rules.

DBA help doc needs to be revised a bit but that's still not allowed.
