Thread: [\[Bug Report\] Quick Theme Select href typo](#)

vyactor - February 21, 2020, 8:53 pm

So basically, its just a typo to the href as far as I came to know.

The quick theme select at the bottom right corner of the website is what I'm talking about. When you just try to change theme to something else, you get redirected to <https://hackforums.nef> and the theme doesn't even gets changed.

I've tried to change the theme through UCP>Edit Options and everything out there seems to work fine.

I hope I posted it on the correct section!

Grizzly - February 21, 2020, 10:31 pm

Doesnt seem to be a problem for me ..

Angela White - February 21, 2020, 10:56 pm

Seems to be working just fine for me. Quick theme selector in the bottom right hand side of the page?

vyactor - February 21, 2020, 11:26 pm

It just came out to be working rn. Not sure if any developer saw it and fixed it xd.

Edit: It's not working again!

Threads with the same issues:

<https://hackforums.net/showthread.php?tid=6049703>

<https://hackforums.net/showthread.php?tid=6048523> (OP said it was fixed on his end, but I still got this issue)

Seems like some sort of cache issue going on? It have never worked for me, and it is still redirecting me to hackforums.nef and a few other members it looks like.

Please note that this is a issue only on <https://hackforums.net/index.php> and not other pages
