If I gave it to one person, another person would want it too, + it will compromise how the script works

Because bustabit gives one default fee. You can go and check there yourself. (fee differs small bit)

Now get the fuck off my thread you sales trasher. ???

Read the messages above ^^^

I'm not showing anyone my profile name because if I did then people will just study easily how the script works since bustabit literally tells you what a player is doing/when their cashing out, when they stop/game id etc and then just see how it works and just skid off my private work.

It is mathematically impossible to beat bustabit in the long run. Please stop selling people bustabit scripts with the false promise of guaranteed profit, especially when you say in the TOS that results might differ per person. Bustabit would have been broke a long time ago if it was possible to beat the house edge.

Edit:

I am not saying you are faking proof and you might even believe that you have found a way to infinite riches but it is just not possible in the long run. The math doesn't allow it.

Trite - February 24, 2020, 8:33 am

Posting my updated discounted copy for a review. Keep in mind that this is gambling and everyone will experience different profits.

Spoiler ([Click to View](#))

Also note I've only been running this a little here and there as I've only played 300 games. I've also been using the more safer script, but may soon try the one for more profits.

I've actually thought about making a script like this, but never got around to it and can say it's actually very promising. This is gambling so nothing is guaranteed. If you're smart and do smart withdrawals you should be fine. Me personally I wouldn't let it run 24/7. If you can't be happy with \$10, \$20, or even \$30 a day that you don't have to work for, you're a fool.

Op could be a little more helpful with setting everything up, but if you've used bustabit before you'll pick it up easy.

I had scrips running for 1 week + in the past and you can still LOOSE I've done the maths, calculated everything with bare minimum margins, bit gambled and still lose 40 times in a row on a 1.26 multiplier, IT HAPPENS! Anyone who thinks gambling is a guaranteed income is a numpty. You will loose in the long run regardless what scripts you use. In most scrips every time you loose your multiplier decreases but the amount increases but you can still land on 0 countless times, people need to be aware that there is no guarantee in profiting from gambling otherwise everyone be doing it.

YES - You CAN win a lot of money I don't disagree but the buyers need to be aware.

Bought the method (Private), I will update with earnings. I've been using Bustabit and made 600\$ without using script so I will let you know how this works out.

Update:

It's a nice script, a lot of work put into them and can make you some good cash. HOWEVER if you are a gambler (Like me) this script is not for you because you'll be making money slowly using it, you won't make hundreds in a day but you'll make like 50\$ maybe.

Still no earning update for now I will post a screenshot later. If you want to make money slowly but safely don't hesitate and buy it.

One note is you should include a tutorial for each script, like what it does, how to use it and configure it. But really fast PM response.

GLWS :)

Bought the Professional Edition!

Just started with 23,3K Bits.....
Will let it run for few ours and then give an update here.

btw: seller supports you directly if you have questions, thanks for this!

edit:
Well got it run for like 10 hours now... and I am at 23,1k Bits. That's not much loss but no profit.
But that's okay, I had it run overnight and I tried around a bit with the config. ?

I'm using the most safest script according to Threat.
So less profit but far safety is the way to go here first of all.
This session I already made 1K Bits in a short time, so I stay optimistic!

Yes. Yes. Yes. I made some k Bits now. Nice!
Will add screenshot of withdraw when it comes to that

edit again:

not the 350\$/Day but this is definitely some money!
(well I bought only the professional package and not the private one)

but I really recommend to monitor this!

I didn't always do, and one time I connected to my vps (where it is running) to take a look and I was exactly at the "all or nothing" moment.

Fortunately it became all, but it nearly gave me a heart attack :D

So I got the money I invested definitely back!

...and yeah, I withdraw 1K bits sometimes, deal with it.?

i have some questions

1. your thread title says \$350 btc a day. is this really achievable with the private script? how much balance you recommend to achieve \$350 a day?
2. what script does the above user Anabolic have?
3. What was the reason behind the above user refund request? did he bust?
4. with the private script how long you recommend us to keep it running each day?
5. do we have to worry about the patching? can this get patched to get us busted or lose?
6. do we have to use any VPN or proxy to login and run the script every time?

thanks

1. Yes it is achievable, minimum investment for these scripts 15k bits (how much he started with)

2. The private scripts

3. He didn't even receive the scripts when he made that, but I don't do refunds so I had to send him the scripts, he did not bust.

4. I recommend monitoring it till you get a nice profit (doesn't take long)

5. This will not get patched, there is always a chance of busting.

6. No you do not have to use a VPN or proxy to use the scripts.

You're welcome.

Hello!!

with the standar version, how many dollars would I need to invest in bites in order to recover the profit in a considerable time? and just cheer me up later by the professional version.

On the part of my hard work sitting in front of the computer for a long time, I could be taking advantage of it to keep an eye on everything working on the bot.

I appreciate in advance! Best regards!

??The min amount of investment is 15k bits, which is around \$100 usd. Since your work is on the Computer, you can monitor this while doing your work easy. If you're going to play it safe though I recommend you get the Pro version or the Private version for safest.

So far I'm down \$1.5k USD with this script.

Plactus69 - April 18, 2020, 11:40 am

My Honest Review:

So starting off - I started by buying the standard script package, which I am satisfied with. I only use one script (which is actually profitable and fairly safe) but the other two are not even close to what I would call "100% guaranteed" profit. Over the course of 10 hours I profited about 6.5k bits with the standard script. The script(s) are extremely easy to set up, just a simple copy and paste.

I then purchased the upgrade to private, which included the private scripts and the pro scripts, and I am extremely disappointed. The only function that is different from the added scripts is a "leap" function, which is not optimized or helpful at all to me. When I asked him to help me set up the script in the way I wanted, he did not have a solution. Because of this, I've requested a refund for this upgrade from him because I am only going to stick to the script I received in the standard package. I will likely end up disputing this since the pro/private scripts are not "guaranteed profit" and I was under the impression that I would be receiving different strategies (he states in his thread that there are 7 different ones), not the same ones I just bought that have a minor tweak.

Overall Verdict: The standard script is a good buy, but the other scripts are neither able to be fully customized nor profitable. The seller appears to not understand or know of basic betting strategies, such as "Martingale", and only gave me attention when I was buying the scripts (he ignored most of my messages, and I had to message him multiple times to ask him questions). He also said that he paid a developer to make the scripts, and he did not make them himself. Therefore I have a reason to believe that he doesn't actually know what he's doing. 10/10 standard script, but terrible

pro/private scripts.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
