Thread: [Made 20K from 1k in 5 months!](#)

Irobert98 - February 23, 2020, 1:51 pm

First time I have ever felt worthy to post in this section as I have been lurking around 9 years always miring everyone posting their mad profits from money they've made online.

Happy to say I have finally started doing well with Forex trading.

I blew 4 accounts in the months leading up to September; where I then decided fuck it and invested 1K into an account.

What they say about forex is true, stay alive and you will make it if you have the right guidance. Honestly guys any of you blow an account keep coming back hungrier and you will be laughing.

Fast forward 5 months and I'm now up to 20K balance and I made £5K on friday alone!

Congratulations. Hopefully you can continue to earn from this consistantly for a good while to come. Practice good bankroll management and I am sure you'll be just fine.

Nice, that's a great flip within a month of time

Holy fuck. Gold jumped some more and made a killing. 23K up so far today and my balance is just short of 43K.

This is the start of something crazy.
