Thread: [Omegle Chat EWhore Packs?](#)

artyhack - February 23, 2020, 9:03 pm

There are no doubt some really awesome packs found here on the forums, many of which are free (and that is much appreciated). But I was wondering if anyone could recommend what the best packs are for live video chat services like Omegle, Chatroulette or Azar? Most of what I find here are stills. I need seamless video loops I can transition too, with proofs and eventually nakedness at the end for the complete experience. Will gladly pay for some new good ones (as the old ones all kinda suck or are WAY oversaturated). CamGAG seems kind of hit or miss (mostly miss regarding realism).

The user [Darkwin](#) has the best VCW on the forum, and should be good for Omegle

But they're not not free nor cheap. I think he has some new ones if you PM him about it.

Good luck in your Omegle ventures.

Thanks, but I'm too new, so the forum won't let me PM him. But if some good samaritan here would like to reach out and ping him and let him know I'm interested in doing business, I'm sure that would be groovy with both of us! And I pay....it's worth it for quality.
