Thread: [DarkHacks | R6S, Apex, Fortnite & Spoofer - 100% UD 'Legit cheats](#)

Abrogator - February 24, 2020, 9:44 am

I am offering invitation to DarkHacks, 1 day trial to access a cheat of your choice, you can continue to stay if you want.

We offer 100% undetected cheats with a spoofer for the said cheats. It is only ESP and plans for aim assistance has been discussed but for the time being nothing is done.

yeah I've used the hack, and it worked as advertised.

Their spoofer is the best I've used yet, and does no bullshit.

I was already banned on fortnite, and the past spoofers I've used were a mess. I used this one, and it just spoofs for 10 seconds max, and you're back in game.

The time I've used this hack hasn't gotten me banned once (and I've used it for 1/2ish days on the same account)

good hack would recommend if you're looking for esp only

edit:

quick mention, the current spoofer has been updated to work with most games including CoD, its a fool-proof spoofer.
