Hello, I would like advice on my website.

www.friedbao.com

Currently i am using google sites and it makes website disgn very easy only downside is that there are very little options as wells as features that comes with it Anyone have suggestions.

Well, the site is fine. Seems to work for the purpose you have. A higher quality design would likely rake in more sales... you're free to do as you wish of course, but I'd recommend WordPress + WooCommerce. Maybe add in a custom landing page that converts viewers into clients. Lots you could do. Good luck!
