Q: How do I send mass emails at once?

A: Just put a comma in-between the emails

Q: It wasn't received or it went into spam, why did this happen?

A: Try not to send from domains like paypal or from gmail to gmail or hotmail to hotmail,
hotmail to gmail works and vice versa.

It's for Windows10. Internet explorer.

I'm on my laptop and not at home. I don't have the tools necessary to ensure to program is safe for me to execute so my review won't come until tomorrow.

I apologize for this. But, yes! Hit me up in PM's.

This seems too good to be true, especially for that price?

I'll wait until 2-3 trusted members vouch for this.

Perfectly understandable, I can in the meantime send a test email to a email of your choice. ?

I cannot update the thread anymore, but i would like to say that this is not for spoofing @twitter.com, @paypal.com, @instagram.com accounts, to prevent for phishing these companies share there STMP data and Network data with gmail and therefore they can tell if it is not from there servers. I will say that this rule only applies to Gmail and Hotmail although.

Every other email combination works perfect.

I know. I would like to send phishing emails (to 100.000 different email addresses).

Do I have to click to the send button 100.000 times or is there an easier way?

It can sent to multiple at one time, I am not sure of the limit but I know its over 20.. 100,000 emails is a lot for a program for 2€ haha

Thanks Ace. ?

Im online if anyone is interested.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

That's not exactly true, I didn't complete a contract with you because I an uneasy about giving my product out before payment, I have had some vouch copies leaked by 'trusted' members and have had to change servers..

It's nothing personal Grim but I am not sure who to trust and I don't think it's a rule for a low level user to give out his product first based on faith, I hope you understand.
