Thread: [Good WinForm UI's?](#)

iCoreX - February 26, 2020, 1:54 pm

Hey,

I'm looking for a good WinForm UI Framework to use, I liked Metro UI but it's kinda outdated, can't find anything on google.

If anyone knows a good UI Framework then lmk please.

Also if anyone tells me to use WPF, no.

montah - February 26, 2020, 4:14 pm

There was a few good ones posted in this section before I believe made by "neonhack" - they look scriptkiddy-ish but some are quite decent.

You could also use DevExpress but that comes with a fuck ton of DLLs being added to your project.

Read properly bro, i'd use WPF but I won't for now.

Accord - February 26, 2020, 7:22 pm

I can create you a custom gdi, but if it is big, use wpf.

Asimov - February 26, 2020, 7:40 pm

Check out MaterialSkin: <https://github.com/IgnaceMaes/MaterialSkin> (I'm sorry about the spaces I can't post links yet)

Thanks for your offer, but I would like to have something like Metro UI just different, Metro UI is outdated.. but it looks still nice.

I don't really like MaterialSkin.

Damn, i feel ashamed for even recommending wpf. How could this happen, why would anyone choose wpf. Omg i cant handle the shame. I mean, besides that you act like a child now, I just don't want to use WPF for that project? You can use wpf for your shitty projects however you want, but I won't? :)

Goku - February 27, 2020, 6:41 am

Any good tutorials on how to create a .Net framework design as a designer?

Sensodyne - February 27, 2020, 7:53 am

I use Telerik if I need something to look "nice" without much effort.

Although I think I've seen a lot of distaste for it and similar ones like dotnetbar.

Jeez, ok boss, me sorry.

I will head to my shitty wpf projects now.

Owl - February 27, 2020, 1:49 pm

A gourmet selection of fine themes for your non shitty projects:

You can use wpf for your shitty projects however you want, but I won't? :)I'm following this thread for some time now and I need to get involved, it is absolutely clear to me that you do not want to use wpf but this part "I just don't want to use WPF for that project" is not clear to me.In my opinion wpf would be the right and the best choice for any type of desktop application especially for what you are looking for because wpf is simply superior and with little effort you can do some really amazing things but of course choice is yours but i advise you to slowly switch to wpf from windows forms.

I wish you all the best buddy.

Ajumma - February 28, 2020, 8:11 am

Paid?

Bunifu Framework (you could achieve some pretty decent designs similar to Bunifu for free if you know what you're doing)

Telerik

DevExpress

DotNetBar

+ a few more if you Google

Free?

Search this forum, there has been a ton of themes posted, some nicer than others.

tweety - February 28, 2020, 8:23 am

winforms is legacy, stop using it

.eXe - March 24, 2020, 3:42 am

You should use wpf, it's pretty cool to work with

Porn - March 24, 2020, 12:22 pm

most winforms themes are outdated, but u can try anima theme;

vb.net: <https://pastebin.com/5A4zQkEU>

c#: <https://pastebin.com/zv1Ufc6g>

iCoreX - March 24, 2020, 4:59 pm

thanks that some people are still trying to help but I just started with web-development, but thanks anyways

Mr. Krill - March 24, 2020, 5:11 pm

there are some cool ones on this forum, ill post some to here after.. most of them don't work though :(
