(Mar 1, 2020 09:34 PM)Shisho Wrote: [\[CITE\]](#) Lrrrr taught me a lot about network hardening in regards to Tor services (although the information is relevant to any service you want to secure regardless of where it is accessible through) and we actually took the time to do it in a hands-on activity.

He's really got an attention to detail and reiterates incessantly that one mistake is all it takes to cost you very dearly. I think that without the knowledge contained within this service and e-book there's probably no reason you should ever consider running your own Tor service.

Thanks again and hopefully people understand the importance!

Just reserved the first copy let's see how this goes.

I will keep you guys updated on the progression of the mentor ship of this training.

VIXV - February 28, 2020, 4:42 pm

Well that looks impressive, GLWS OP. I'm sure the content coming from OP8 is high quality stuff.

Stanley - March 9, 2020, 12:08 pm

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
