Every day, infiltration experts are hired to obtain information about illegal sites in Asia without risk.

Different sites are available every day, with each site earning from \$ 1,000 to \$ 100,000

Commission amount depends on the number of registrations on the website

I need to get all the information about registrations and mobile numbers in the databases of these sites, and I will pay \$ 0.01 for each registered user. These sites have registered between 500,000 and 5 million users (the country's phone number is 11 digits and starts with 1).

The company will use Bitcoin, Ethereum, USDT to pay commissions in various ways.
