Thread: [Get rid of activate windows message?](#)

Crypt - March 1, 2020, 1:11 pm

So I installed windows 10 but obviously without an activation key, I found ways to get the message to go away but it comes back after re-start. Any better ideas?

It doesn't bother me enough to pay for a windows 10 key.

I can give you a link for Amazon FR where keys are sold for 15\$ (Win 10 pro), otherwise you could automate what you manually do for each boot, with the task scheduler maybe ?

Still in need of a fix and are you using home or pro?

If yes to the first one then hit me up with a pm :)

Ignore it then.

I don't condone buying \$2 keys from ebay but... rumor has it that works.
