Thread: [Spoofed & bulletproof Hosting - Free to all](#)

**SpackHost** - March 1, 2020, 7:02 pm

Hi guys.

I want to share my hosting for spoofed, bulletproof servers and more.

Also have a dedicated page for vouch and proof.

Price are cheap and power is really nice.

<https://spackhost.com/>

Have fun!

Hi guys.

Vouch copy 0/1

Only trusted member pm me!

Kind regards

**Shisho** - March 1, 2020, 11:00 pm

I can provide you a vouch in return for a spoof server.

EDIT: definitely a scam.

EDIT 2: might just be you using the same trash hoster template as everyone else not even being able to remove / change the fake address provided in the template. Or you're running a bunch of services to scam people, who knows.

Looks like a scam, the address provided on the website is used by multiple hosting providers and is in a residential area in a German city.

If you're literally posting screenshots for you providing illegal services, don't act like you're a legitimate company.

The system status looks trashy, hasn't been updated for like 2 weeks.

Don't use copy-pasted terms of service when you're not an actual company either.

That's just my opinion though, do whatever you find appropriate.

I'd also fix the grammar mistakes in your second and third review from your 'Anonymous' 'Stresser Companies', having grammar mistakes on a website doesn't make it more legit.

You might want to remove the fake names too, waste of time having them on there if anyone with a brain will see that you're not legit anyway.

List of shitty hosters that come up on Google when searching the (fake) addresses you provide for your 'local branches':

(Also they all use a similar shitty template with the same shitty fake data, can't prove that you own them but it's trash lol)

Yea ok, on this forums alot of people alredy bought it and are very satisfied, i dont know what type of thing hitted your head for thinking this shit solution about the website ip. We host our website in another hosting for security reason (who host website in a spoofed server???), we also give test and proof (also have a website page with). Yes i know is an illegal service, and? We can't be professional? And last one, our website is still under construction.

Kind regards ;)

You're not professional at all.

Your terms of service page is cypasted trash, your English sucks (especially on here), I never mentioned anything about your website's IP, I just said that you use the same wrong address on all of the "hosting" services that all look extremely similar.

If you're running a "business", at least do it well. I'd like to see you give out "test and proof" for dataservers you don't own in cities you don't know.

I'll drive up to "your" business address in Germany and ask around if anyone has ever heard about your company Imfao

Conclusion: You're a bad liar (and also a bad scammer)

Aaah this kid in this forum that think they are very nice in this camp. Take your life in you and hand and go out with some friend retarded nerd. Our tos is okay, just read it ahah, we are making alot of money and people are really satisfied so who fucking care about your life and you. Bye let me know if you need a server ?

And dude ahah. Come in skype i will give a server for free ahah you so idiot

**Jimmy Conway** - March 3, 2020, 7:34 am

Looks like a scam to me, as he advertises on every post and calls every other hosting company a scammer. DWC.

I enjoy exposing scamming kids, that's what I just did to you.

Also I don't really care if you make money or not, you're still some broke kid.

I recommend you just be quiet now, work with what you have if you are legit. You keep spamming this shit all over the forums and no one cares. Literally not seen a SINGLE REPUTABLE vouch for your service. If someone wants to buy then they will, no one needs to be reminded of your hosting every week

Ohh

I can only say that you did not have enough brains to come up with your own advertising strategy. which of your friends used our services?

**Fuk Yeee** - March 4, 2020, 7:23 pm

HOLY SHIT THEM PRICES ARE HORRIBLE! You can get a VPS Bulletproof that actually doesnt give a fuck what you do on their servers. DMZHOST.co
