Thread: [Hosting Providers for DDoS](#)

R391.875 - March 2, 2020, 11:14 pm

Hi, I would like to host a DDoS as a Service platform in order to plot the stress testing service in a better way. I heard Shinjiru is a reliable service in this arena. I would like to know more better options.

Which hosting provider should I go with since many of the legacy CDNs restricts DDoS service?

A list of legit providers (who does not take down my servers) would better help me to figure out and can go with it.

Thanks in Advance!?

Your trashy host is just as much of a scam as his page.
