Thread: [Bitcoin Price will reach \\$30,000 end of this year?](#)

SIM-48001 - March 4, 2020, 9:31 am

is it true ? heard this everywhere
is this good time to BUY?

Seagulls - March 4, 2020, 9:39 am

I just got my crystal ball out from the cupboard and dusted it off. Yes, Bitcoin will reach \$30,000 by the end of the year!

He heard it everywhere!

But really it's a stupid question. What would you think? If your money was going to go 3x or more in a year, would you not invest?

I had a dream, that one day...

Geralt - March 4, 2020, 2:48 pm

Everything is possible at this point. But realistic number would be 15k max.

^^

I will go with this advice for now. BTC prices can increase with high speed but covering 30k same year wont be possible as far as I know. I am working on PI these days though. It will definitely go up someday.

mine....

50k by May 1st but it'll be \$0.15 on April 32nd

Baller - March 4, 2020, 3:45 pm

Anything is possible but I highly doubt it to be honest.

?H?A?C?K?E?R?? - March 4, 2020, 3:46 pm

be lucky if coin ever tops 15k again

I got it by investing in dogecoin and this nice beach house property in Idaho.

maglincer - March 5, 2020, 12:04 am

30K...maybe not this year but I think the odds favour it in the next few years

SIM-3467872 - March 5, 2020, 4:34 am

It will surely reach \$30k but not until the next few years.

01001 - March 5, 2020, 5:54 am

The prices would go up, but not more than \$15k+ by the end of this year. This is what I could sense, although it's uncertain.

sunflower69 - March 5, 2020, 12:31 pm

I'd be happy if it does.. but that's highly unlikely :)

zezitoooo - March 5, 2020, 2:13 pm

step 1: buy
step 2: hold
step 3: keep holding
optional: repeat 1

What is the source of your prediction or info? I doubt bitcoin will pass 15k limit for this year. I personally think it will plunge towards the last quarter of the year

Digital game payments - March 6, 2020, 6:42 pm

I am saying \$20,000 by year end!

What is the source of prediction or info you have for it plunging forwards the last quarter of the

year? Or is it just a hunch? Personally think it'll hover around \$14k-\$16k, but that's just a hunch.

Captain Morgan - *March 8, 2020, 11:01 am*

I highly doubt that this would happen in 2020.

But the halving does provide us with better odds than last year.

It is, without a doubt, going to be interesting to see what happens as the date hits.

Miners are gonna shut down their farms, prices are going to go up a little.

What I look forward to most, is all the cheap mining hardware that will come on sale :D
Means I can snatch a cheap miner or two to play around with.
