Hello!

I found this blogspot that has a tutorial about how to get everything for free in G2A

I read it and it is something about buying with bitcoins and getting refunded using some scripts sth like that.

I am afraid to try it. Has anyone one here use this method?

here is the tutorial freeg2a.blogspot.com

Fake method.. the fund you send will be going to OPs or the blog owner BTC address and you won't get nothing.

Remove the fake method and don't fool people here
