Thread: [Anyone Please Assist \[SPYMAX\]](#)

Nsike Fakude - March 4, 2020, 10:44 pm

gooday

I trust that everyone is well.

Someone Please help me, yesterday i setup a Spymax, everything seems good, I FOLLOWED AN UNRELATED PORT FARDING YOUTUBE VIDEO that uses openvpn, im not quite sure what port forwarding is and how it works, i was getting bits and pieces of info on how to setup the rat from many sources, now the rat is on my VB machine, i try to install the malware on an android and its not showing, someone please help me fix this via teamiewer please.

i really wana get into ratting with all my life, please someone out there please help me out, im on discord, 1 guy yesterday wanted me to pay \$25, thats alot for me at this moment.

I'm not experienced with openvpn, but you could use ngrok instead of that. Its easy and quick to setup, if you have any questions regarding setting up ngrok or whatever feel free to ask.
