Thread: [Relnk | URL Shortener and content locker in one, please review](#)

70up - March 5, 2020, 12:57 pm

Hey guys,

My friend and I created a URL shortener site that allows users to lock any content on the web and make people complete actions for accessing the content, such as subscribing or following or retweeting or even social sharing which will lead to semi viral if done correctly.

The website is completely free 100% so I'm not trying to advertise in here as I faced this problem and we thought it would be fun to create

relnk.co

please share with me your feedback

Thanks

The link: relnk.co

Doesn't work, it's a template he ripped from somewhere and just changed around text. Some components are broken.

I didn't rip anything, the template was provided by someone for free which contains the design only, but the main functionality was coded from scratch

I would love to learn more about the broken components so I can fix them, it is the reason I posted in here for your feedback

I appreciate it

as I said the links system was coded from scratch, you are more than welcome to try it.

I also would love your ideas guys on how to promote such a site, I imagine it would be useful to some.

Thanks

nice post man :)

thanks for this

Nothing happens here when I create the short link. It just gives me a blank hoverbox.
