Mostly today minecraft servers just aren't the same as years ago. Hate all these hub servers, and it seems like 99% of the servers you join are hubs. Mostly been playing anarchy servers such as 2b

The One And Only - March 17, 2020, 5:25 pm

I am trying to make a stricly factions server. No hubworld BS I am looking for builders to help out

SIM-2263652 - March 19, 2020, 4:14 pm

There's currently about 60,000 people logged into Hypixel. This is without a doubt relative to the virus, but people do in fact play.

I haven't played since beta - I've been tempted to get back into it though

I played a handful in the early days, but that's mainly it. Went back to fuck around on it for a couple of days tops here and there with friends, but never anything serious. Nonetheless, had a lot of fun on there when I did play. Don't think I'd ever care to play again though.

F4tDoinkz - August 3, 2024, 7:44 pm

Been a long time since I have been addicted to Minecraft. Beta days.

Was a banger game and the first of it's kind in a lot of ways back then. Had a lot of fun with it. Only lasted so long though. How it goes with lots of games of course.
