Hiring someone to build my WordPress "micro niche" blogs. Will be needing 1-3 built each month. I provided the domain, hosting ect

I will provide the content & featured images. Most pages such as Privacy Policy, Contact, ect will be completed already.

Here is an example of a theme I recently purchased I am needing built to look similar to this demo.

https://mhthemes.com/demo/?theme=magazine_14

Paying \$60

DM Me if interested

Let me know if you are still looking for someone. As I got years of experience when it comes to WordPress.

I can do this for you, no issue. We could even use newspapperx theme.
