Thread: [Bounty Thread - Marketplace sub forum or Tab ?!](#)

LoremIpsum - March 7, 2020, 2:27 am

Hello there!

After [Xerotic](#) his bounty thread and seeing [Natas](#) bounty thread of 5000 Bytes to kill my Hackúman, I came up with this idea.

Why not make a sub forum or section for "Bounty" strictly made for Hackúman. Features;

- < made Bounty starting from 1000 up to 10.000 Bytes
- < post proof of killing before being rewarded
- < no more SPAM in The Lounge section
- < Members will be buying and selling more Bytes

All I can think of is more beneficial to HF. But I'm not sure if other members like this idea? Let me know!

[spiral](#) had this idea;

(Mar 7, 2020 03:32 AM)[spiral](#) Wrote: [\[CITE\]](#) I feel like a subforum would die quickly. A better idea would be to add a bounty page in the hackuman game, you can pick a dino you want to but a bounty on and then whoever kills that specific dino would instantly be sent the users bytes.

<No more -5 rep for killed hackumans

That's mature of you my man!

Please kill one of [Herbert](#) his Hackúman if you can.

I love how he claims to be 'sarcastic' and "not mad" while rating me -5 for killing his Level 1 little pet ? I'm going to make it a daily task to get his Hackúman killed, again and again, until I have my +5 back hahaha. Evil, isn't it?

I didn't think about that. I love your suggestion! I hope [Xerotic](#) will love it too.

Like the "Hackgame" got with in-game cash but with Hackúman bounties, would be amazing

indeed!

As [spiral](#) said, it would die quickly. Alternatively, we might eventually have a dedicated SF for HF's mini games.

Are you actually triggered over popularity? Imao

[spiral](#) had a great alternative for it!

No I'm not triggered over some rating, but I love the fact that Herbert denies to be mad but refuses to +rate me haha.

That is just plain proof to me that he is mad, over a Level 1 kill. Gotta enjoy life and show some members I have a strong fighter, yet like Sick's monster.. I assume mine will be gone too for 5000 Bytes any time today!

Haven't been able to experience yet but upon reading posts would it make sense to have a level cap for what levels you can attack? I dunno.

Anyways I think if there was a bounty tab that would be better than a subforum. That way the bytes can be put in straight away and held in the bounty until that Hackuman is eliminated.

So far everybody is liking the suggestion of [spiral](#) and I hope Staff will look into this!

Yeah it seems like a great idea and who knows, it's probably already in the works which would be pretty dope.

Happy hunting.

The best idea definitely, Xer will like this.

Maybe, I don't know.
Are you [spiral](#) ?

If a bounty element to the game is something to be permitted, why not just add it as part of the game functions instead of a forum? I lost my egg randomly after a few days since I didn't hatch it but seems like there are tons of ways the game could be developed.

Agree with this one thousand percent.

I think Xerotic could do such thing if a lot of members will agree to find it useful.
If it isn't already being developed as we're speaking right now. I have no clue.

I'm actually routing for this what an easy way to handle some bounties and handle my gambling addiction at the same time.

I assume and hope that there will come a 'Tab' at the Hackúman game for bounties. But we'll have to wait I think!

Xerotic - *March 7, 2020, 10:56 am*

Hackúman is still being developed. Hackúman threads are not spam either.
