Thread: [Selling Custom Crypto Casino Source](#)

runegp - March 7, 2020, 6:15 am

Hello!

I'm selling my gambling project, which i've spent over \$5k+ on from Design to development.

The price im looking for is 700\$.

It includes a almost ready to go website for crypto with a roulette wheel, and dice game(Need testing).

It has the following features:

- Investment System (Users can invest to make the bankroll bigger) (Needs some adjustments)
- Live Chat
- Rewards. (- Social Roulette (2x, 3x, 5x, 50x profit!) (Hourly reward (100 Satoshi))
- Bitcoin Deposit System / Withdrawal System
- Bankroll System (Users can only win max 5% per bet)
- Affiliate System (0.3% of everything your referred user plays. win or lose. and the user gets 100 free Sats to test).
- Solid Platform

The site is developed by a professional team, and has very clean code.

This project is using technologies: * Building: + Node.js + npm

Development: *Back-end: + Pug + Express + Mongo DB + Mongoose + restAPI + Socket.io

Hiring a developer to replace the current payment getaway system(Payment getaway shut down), is required, and to make the last changes for the dice game. (It should be finished, but needs further testing).

<https://bitcointalk.org/index.php?topic=3059657.40> on bitcointalk.

This was the original thread for it. (I would get a new logo and domain).

[contract=tid]Start Contract[/contract]

Have you sold it already? you planning to sell this only to one person, right?

If its still relevant i would like to hear some more details.

I would first of all want to see the core design tho.

HMU if its still for sale
