Thread: [What are the best ways to earn Coins/Crypto in 2020?](#)

protons - March 7, 2020, 10:34 am

Guys,

I'm new to Crypto world. After joining HF and reading many posts about it my interest in making crypto is growing.

Would you guys suggest me the best ways to make about \$100 a day in BTC or other coins?

Sorry I'm really a newbie in this ??

01001 - March 7, 2020, 11:52 am

Welcome to HF. You can earn crypto by investing your money and wait for it to grow, but I won't suggest that since you are new to it.

Secondly, people sell their services on HF and charge in the form of crypto, which is also a great way to earn in cryptocurrency.

I'd suggest you read more about cryptocurrency and check out some crucial threads on HF to have a crystal clear picture on this topic!

There is no way to earn \$100 a day in bitcoin other than gambling or selling a service. You will not find enough free crypto to tap into daily to earn \$100 a day. Any ebook you see on here that says otherwise is a joke. Beware and stay away from ebooks. :)

Thanks @01001 and @Kill Joy,

According to your suggestion I guess selling service or products for bitcoin would be the best way now to make it.

I think a good way to earn crypto would be to invest your time and get a job and buy crypto currency with money you earn.

That's what I currently do and I put aside 1000 dollars every month to buy bitcoin.

Good luck bro

Yes, exactly. Or you can go in on a different coin by buying a masternode for a couple thousand dollars and sit back and watch your investment make you some money. Check Divi and PIVX. :)
