Thread: [Prevent DDOS Attacks on OVH](#)

Fiend - March 9, 2020, 3:16 pm

I see a lot of people asking how to block bypasses on OVH .etc well here is some rules to block and get you started

hope this is useful

Code #Most common AMP attacks

```
iptables -t mangle -A PREROUTING -p udp -m multiport --sports
3283,37810,7001,17185,3072,3702,32414,177,6881,5683,41794,2362,11211,53413,17,1900,1000
1,389,137,5351,502 -j DROP
```

Port 37810 | FN LAG

```
iptables -t mangle -A PREROUTING -p udp --sport 37810 -j DROP
```

Port 7001 | OVH KILL

```
iptables -t mangle -A PREROUTING -p udp --sport 7001 -j DROP
```

```
iptables -I INPUT -p udp -m length --length 100:140 -m string --string "nAFS" --algo kmp -j DROP
```

Port 17185 | OVH SLAP

```
iptables -t mangle -A PREROUTING -p udp --sport 17185 -j DROP
```

Port 3072 | OVH DOWN & OVH DOWN v2

```
iptables -t mangle -A PREROUTING -p udp -m multiport --sports 3072,3702 -j DROP
```

```
iptables -t mangle -A PREROUTING -p tcp -m multiport --sports 3072,3702 -j DROP
```

Port 3283 | OVH Crush V2

```
iptables -t mangle -A PREROUTING -p udp --sport 3283 -m length --length 1048 -j DROP
```

Port 3283 | OVH Crush

```
iptables -t mangle -A PREROUTING -p udp --sport 3283 -m length --length 1048 -j DROP
```

Port 32414 | NFO LAG

```
iptables -t mangle -A PREROUTING -p udp --sport 32414 -j DROP
```

Port 177 | NFO LAG

```
iptables -t mangle -A PREROUTING -p udp --sport 177 -j DROP
```

Port 6881 | NFO Clap

```
iptables -t mangle -A PREROUTING -p udp --sport 6881 -m length --length 320:330 -j DROP
```

Port 32414 | R6 LAG

```
iptables -t mangle -A PREROUTING -p udp -m length --length 280:300 --sport 32414 -j DROP
```

Oh shit we got a badass over here

Shisho - March 11, 2020, 7:07 am

This won't help in the slightest.

Shisho - March 11, 2020, 7:59 am

(Mar 11, 2020 07:10 AM)Red Sox Wrote: [\[CITE\]](#) In no way shape or form, literally. ???
iptables works at the kernel level meaning that a flood that bypasses VAC will also bypass any iptables rules if it hasn't already exceeded the interface limits.

(Mar 11, 2020 08:00 AM)Red Sox Wrote: [\[CITE\]](#) It's a relief to see there's still knowledgeable people active on here.

Looking forward to what your group produces. ???
We're working on a ton of really interesting projects.

Check out some of the CTF challenges I authored :)

Good to see this sub-forum haven't changed from the usual shit show.

Bob White - March 11, 2020, 9:23 am

I need all the eggs you guys have in this thread!

It's pretty much a resource for skids.

it's dead like all the other sub forums related to "hacking". I don't even know why this website is still called hackforums and not "moneymakingebookmarketplace.net".

Shisho - March 11, 2020, 3:26 pm

(Mar 11, 2020 02:59 PM)Red Sox Wrote: [\[CITE\]](#) Give the site a little more credit than that. Only way for a change to happen is to make it happen.
And some of us are trying really damn hard!

Talking a lot of shit for someone with a 2019 join date...

Twitch - March 12, 2020, 2:28 am

these shit ass rules wont help against a udp checksum method LOL

3xploit - March 12, 2020, 10:31 am

damn, I forgot that I joined in 2019 and therefore cannot have memories about the time before. I apologize.

But honestly, there are almost no threads about real hacking here, only skids everywhere.

And you say that like it's a bad thing.

I bet OPs first post helps some members with some attacks and prevention methods. There is almost no 100% single method to prevent all forms of DDOS. That doesn't mean you don't fit pieces of a puzzle together in order to create a full picture.

DDOS prevention requires constant diligence and changes to structure for effectiveness.
