Thread: [Fortnite NO HWID Spoofer works for me? Even 100% working ones](#)

znc - March 9, 2020, 4:21 pm

I've never cheated in Fortnite, but I was cheating in Rust a few weeks ago and had Epic open. I think the HWID spoofer of the Rust cheat was super detected and got me fucked on Fortnite, too. Since then, when I try to play Fortnite on fresh accounts, I get kicked out at or after the bus drop.

I've bought 4+ spoofers that are working for tons of people and vouched by tons of people. I've even talked to the devs. NONE work for me. My HWID and everything gets spoofed, but I still get banned right after the bus drop or a little later. I've also changed my IP address, so that isn't the problem.

What the fuck?

Does anyone have any ideas?

Thanks

If you ever got banned on EAC, do a clean install of windows and use a spoofer to get unbanned. Also if your using a m.2 SSD most spoofers dont support m.2s just fyi. you require cleaners to get unbanned as well as fortnite has tracking files but most cleaners out there are really old and do not have the latest ones to get rid of and most of the time it fucks up certain functions of ur pc. If fortnite starts up battleye, I suggest just find a good cleaner. The best option is to do a clean install of windows and use a spoofer.

Just reformated and spoofed. Didn't change my IP but going to try that next...

still got banned.

I played a team rumble game, didn't get banned, went into a solo, basically got banned instantly after landing.

WTF is this shit!?

What windows 10 version are you using? What spoofers are you using? Is your ssd sata or m.2? How fast do you get banned? If you did a clean format you will be unbanned as long as you are using a ud spoofer, also what ac did u get banned in?

If you are still having trouble just dm me ill see if i can help u

itsfuzzwuzz - March 12, 2020, 1:45 am

you need to buy a new hard drive and install windows start fresh this is what i had to do i was using Xeraph fortnite hacks then everything went down hill after 1 month

Smexy - March 12, 2020, 2:11 am

LOL fortnite bans are a fookin joke.

Okay, so replace MOBO+HDD because that's what fortnite uses.
done! a wee bit of a idiot could figure this out "easyanticheat" puh
