SIM-4147789 - March 15, 2020, 8:01 pm

HF is being glitchy today? I'm not sure what's going on but i'm getting lots of MyBB error pages....
not sure if im able to send right now but I will send as soon as I am able.

6 Bytes isn't much but it's more than 0 so count me in my man. First post here!

I do it for the Reputation, and to build my threads, and to provide value to you guys, which is why i'd have a rep in the first place. Trying to share actually useful knowledge to people and be a gateway to understanding. to get there in a big way, I want to be respected around here for what I offer to the community.

think about it. The bytes I got are easily worth a quick \$5 btc....

but I got most of them from purchasing leet, which cost me \$15. so the way I see it, I'm using the assets of my promotion to leet for purposes other than profit.

for me, it's the big thread, and also promoting my book. This giveaway is helping me reach minds, based on regular visibility and exposure.

so you see, this free 6 bytes to you is 300 people on my thread who all stand to get a smidge of something just for participating.

and for me, it means people see my signature on their way to getting some free bytes. so you see, it's like peer to peer advertising :)

i get maybe 5-7 pm's daily for the book, so I'd call this thread a colossal success considering it's \$5 worth of stuff, but show up here 10 days and u got 6 cents for leaving a comment, seems like a pretty good trade to me,.

see this comment? this is why i write books lol it's just something I do, i freelance writing online, and im just trying to gain exposure to the ideas that I'm sharing, to those with the curiosity to see what im pushing. esoteric on purpose :)
