Made it yesterday!

I like the design but you have many mistakes in writing, go through it once again and fix the mistakes :)

Very straight-forward, good colouring, font isn't annoying, not a lot of gibberish, so I like it.

Can you tell me where the mistakes are? I'm not native English.

Would really appreciate your help!

I'm not 100% sure because I'm not the native English speaker either, but I'd rephrase the first line: "Tired of not getting enough sales?".

Business men needs to be businessmen, without space between.

It's necessary with 1 c, you wrote with 2.

Use not take middleman.

It's not remaining, it's remaining.

It looks extremely professional, if that's what you were aiming for you've hit the spot.

Here is my perspective. The profile circle being tilted gives me a headache.

Header spacing is far too big.

Use typography accordingly based on design, too many different fonts that do not fit.

The positioning, alignment and dimensions are just not doing it.

Footer lacks creativity.

I sorta like the texture, but what's with the fade in random areas?

Colors are OK, I personally prefer darker but that's subjective.

4/10

Thank you for your perspective.

The pattern texture fade came from the original pattern and I just kinda winged it.

Personally I think it lacks some content & I believe that if you put just a little bit more effort you can actually

add some life to the design besides just having text with some minor basic modifications in blending options.

You have a right idea for text positioning & choice for font that will describe content it's readable & professional looking,
but honestly font & style you used on header & contact is quite a failure in my opinion, it gives a bit unprofessional & amateur look that an elementary school youngers would create in school after their first class.

Can't really judge your design skills there as it's only the text & background basically,
looking forward to see more of your work & improvement, you have the potential. :)

I like the design very much, well done.
Did you use Illustrator or Photoshop?
