Thread: [Received a payment 4 hours ago, 0 confirmations](#)

Perileos - March 11, 2020, 10:29 am

Hi.

I received a payment about 4 hours ago and the payment remains at 0 confirmations. What can I do to speed up the process?

Cheers

Search up on google for the btc accelerator

Flash ? - March 11, 2020, 10:37 am

If it is btc use this

I received \$10 a few hours ago. 0 confirmation so far. I'm sure it would be confirmed soon. P.S. I know I can use BTC accelerator.

Mula-B - March 11, 2020, 11:41 am

There some free BTC accelerators you can use

AYMG - March 11, 2020, 12:00 pm

No need to search on google for BTC Accelerators, HF has one.

<https://mempool.space/>

Check this out, it tells you how many transactions are in the mempool and incoming blocks and stuff, it gives you an idea about why you transaction takes time to confirm.

Ortek - March 11, 2020, 4:14 pm

Dont worry guys, i overclocked my Antminer S17 so they will confirm a lot faster lol

Just kidding.

No worries about the confirmation time, sometimes it can take a while. We are all on the same boat

Any update on this ?

still not working for me

MaxiPads889 - March 11, 2020, 11:07 pm

I sent a transaction 1hr ago. Fully confirmed. 40c fee. (24.4 sat/vB)

Huh, I did not know this existed. Thanks for the info! ?

passCODE - March 12, 2020, 1:10 am

I guess it's because of the current state of the market. You probably won't need to wait longer than 12 hours, 24 max.

Appears it worked because I am upgraded now. ?

Smexy - March 12, 2020, 2:10 am

It's probably the chinese trying to return a corona coin to ur house.

burn the spiders now.

SIM-4274998 - March 12, 2020, 2:17 am

again bookmark this website

<https://mempool.space>

it tells you how many blocks have been mined and how many are coming, also the mempool count (how many transactions are waiting to get confirmed/included in a block)
