A LITTLE ABOUT ME

I am a developer with the experience of a few years who is very interested in computers and the way they work.

A LITTLE ABOUT THE PRODUCT

It is a source code of a website I personally made, which allows individual users to submit their usernames for various social media and for them to easily add the submitted usernames. The website uses the latest technologies and has an intuitive, responsive and reactive design which allows even perverts with all the blood in their dicks to get a hang of it.

WHAT SOCIAL MEDIA DOES IT ALLOW?

It allows the popular social media platforms listed below to be submitted. You can also edit this for yourself

Snapchat

Instagram

Kik

Skype

Telegram

EXTRA FEATURES

The extra features include:

SEO optimization to get even more results

Straightforward, easy interface

Anti-spam protection: don't allow the same IP or username to be submitted within 60 minutes (configurable)

Design which works across all devices, from phones to computers

Clean, fast and lightweight code, and usage of the latest technologies

Pre-made space for ads (on the top and bottom of the website)

and more...

WHAT CAN THIS BE USED FOR?

You can use it for many things. Including, but not limited to: Selling sticky listings

Putting your own ads

Generating ewhore traffic for yourself

EXTRA HELP AND FEATURES

I also offer help setting this up and I take proposals for features to be added. We can always work out something suited for your own personal needs.

Any new updates will be sent to all of the customers.

WHY SELL THIS?

I am selling this because I am no longer interested in marketing and advertising. I am also going to work on reverse engineering games.
