Thread: [Experienced .Net % #C Coder/ Multiple SUCCESSFU projects that need restoration! \[\\$\\$\\$\]](#)

Money Man - March 15, 2020, 2:33 am

Backstory:

Not looking to work with some shit head or any time wasters, experienced lads only. I have a good amount of funds to get these operations going and already started recovering most source files. a good friend of mine passed down various sources / projects that were previously sold on many forums including this forum with great success (refer to one of the photos below for one of the projects income). The reason for him passing them down at a cheap cost is because he is a very good friend + makes 300k\$ a year and doesn't need this shit.

DEVELOPERS / VENDORS / EXPERIENCED FOLKS ONLY. LOOK AT MY PREVIOUS HIRING THREADS FOR CODERS, don't bother PMing me For
More information or the sources if you don't have the credentials.

Some of the projects:

Languages: .NET AND C#

A well known/ sold Keylogger that sold pretty well a year ago before updates were needed.

Proxy scraper

Skype Jacker

Lunar Tool Kit

And many more which are outdated but can be sold greatly with a DEDICATED developer.

I am not interested in hiring a developer to fix the projects up, I am looking for a PARTNER who is besides me to fix on issues and expand the operation.

Most of these projects have GFX made with animations which can be sent to people who are interested / have the credentials.

From one of the operations in the past;
