I'm looking at the image and honestly there's too much going on. I would suggest changing the font and dumbing down the design so it looks more minimalistic. But that's just my opinion, if Yert likes it feel free to leave it as it is.

Big agree here. Certain elements of this are great, but overall super cluttered.

Lower the tracking on the font, make it a lighter weight, and just space things out- let the design breathe!

The text is very odd and the overall design is not professional, plus i believe that 15\$ he paid you is more than enough, it is not a professional work.
