Thread: [Socket Crashing](#)

Omniscient - March 15, 2020, 11:33 pm

Seems that we're having some socket crashing. This breaks the notifications and convo features of HF. It also wreaks havoc with regular functioning like post replies and form submission.

I don't see @xerotic@ on now but I think he did some file changes and may have introduced a bug. Likely this won't get 100% fixed until the morning. He's the JS expert and I don't want to touch this without first understanding what alterations he might have made.

Sorry guys. If it keep crashing it will likely cause bugs all night.

SIM-1729678 - March 15, 2020, 11:37 pm

That sucks but it happens. We'll just wait it out ?

rSM- - March 15, 2020, 11:41 pm

No problem Omni, you and [Xerotic](#) have done a great job so far with everything y'all have done. Keep up the good work fellas :)

BTB™ - March 15, 2020, 11:50 pm

No worries. We can wait.

Cheers.

Dorrance - March 15, 2020, 11:50 pm

No worries as long as the hackuman game isn't affected, I can wait.

Tesla - March 15, 2020, 11:51 pm

No worries man, thanks for the update

Blazin - March 15, 2020, 11:52 pm

Solid answer and smart decision. Hopefully xero can update whatever he's done and tweak it I did notice it glitching out a bit earlier.

123 - March 16, 2020, 12:17 am

Yeah I was posting a reply on a thread and it never got posted there. I thought the problem is on my end.

Saw this thread and now I'm fairly certain why this all was happening.

Saul - March 16, 2020, 12:19 am

You are being so candid with the details even though it is not mandatory.
I just love it

He just shares the whole issue and not giving a vague update, that's what I like.
Why is that a reason to contemplate my post lol

Dorrance - March 16, 2020, 1:29 am

Well thank you, I'm on mobile atm and I think King Xerotic has fixed the issue Houston.

Bluffer - March 16, 2020, 1:30 am

Ah that explains why I was thinking my posts weren't submitting.

Hope it's fixed soon

Xerotic - March 16, 2020, 1:33 am

No socket code changes were made in the past few days so a bug must have existed that simply took time to trigger. Luckily I was able to quickly spot an potential issue. A few lines of code later and the socket connection seems stable. Hopefully it stays online until morning when I can take a closer look at things.

Big love for you! Have a good sleep my man.

Dorrance - March 16, 2020, 1:55 am

I have noticed there are still a few issues with the one at hand currently.

If you click the last post it takes you to OP.
Delayed posting the server doesn't refresh or show you it submits the reply.
Server load time is pretty slow.

SIM-3587630 - March 16, 2020, 4:05 am

Looks like my replies are not showing on threads, I'll just wait :)

Omniscient - March 16, 2020, 8:26 am

Looks stable now. Thanks everyone.
