Thread: [Post not showing up?](#)

Jimmie - March 16, 2020, 11:15 am

I posted on a thread and came back to see if anyone replied and for some reason my post isn't showing even tho it exist?

<https://hackforums.net/showthread.php?tid=6057278>

Spoiler [\(Click to View\)](#)

[Video: <https://www.youtube.com/watch?v=J5uMcS9fRq4>]

Instead it's saying the person who posted the thread replied instead?

Omni already mentioned in one of his thread one of the socket is crashing which cause these problems.

You can read more about it here.

But only after someone posted after him.

If [Klonopin](#) did not post, then OP's post would not be visible. This has happened on a few threads that I've noticed recently, and the only way to get the missing post to reappear is to have someone else post after it.
