Thread: [Telegram scrapper / Telegram mass group add bot](#)

The Broker - March 19, 2020, 3:14 am

Do you know where could I get such service? Thanks.

There is people selling advertisements for real audience to your telegrams groups. I always prefer this rather than making a random group chat.

What I am trying to do is to add all users from competitor group, to my group, without doing it by myself 1 by 1.

There were couple of projects which we used for Telegram scraping but no solution for mass group add bot. Will consult with our devs and update you.

greetings!

Hello, i can do it as a python dev.

You just have to create several telegram accounts on your side (i know some way to do out without own several phone numbers)

I can make a bot that :

- scrape member of a group to a csv
- invite member from csv to your own group
- bulk send message to telegram member from csv

You can contact me on telegram : @EdenEther
