Thread: [Brave browser lagging lately.](#)

Net - March 19, 2020, 12:35 pm

For the past 2 days my Brave Browser has had some lag spikes for a few seconds (completely unresponsive) and when I check task manager it takes almost up to 60% ram. Anyone else have this issue or knows a way to fix this?

Xerotic - March 19, 2020, 12:36 pm

I've noticed some performance oddities with Brave recently as well. I wasn't sure if it was just me or not. Nothing too serious, but random "pauses".

SIM-1729678 - March 19, 2020, 12:37 pm

It crashed on me yesterday for no reason. 7 tabs open, nothing too resource intensive.

Net - March 19, 2020, 1:48 pm

Ok, so it looks like it isn't just me.

duplex - March 19, 2020, 1:49 pm

Seems to be working perfectly for me

Rsynced - March 19, 2020, 2:17 pm

Have you been updating? Mine is smooth as butter. On linux mint.

Yeah i have some issues just all of a sudden my screen goes black i have to wait maybe 5 minutes then Brave opens back up .. I'm only talking maybe 1 time every week pain in the arse if your doing something when it just crashes .. Switched to Chrome for a few weeks and didn't happen at all . I like Brave so hopefully what ever is causing this will sort its self out ?

Make sure to keep brave updated. I have noticed some glitches in the past but the updates always seem to fix them.

I do mate infact it's showing an update just now but this freezing ans back screen and totally unresponsive is not good .. You just gotta sit and wait it out then boom it's back on
I will update and hopefully it sorts it out .. Thanks mate ?

You know what i really like about Brave when you open an new tab some of those pictures are absolutely amazing .. And of course the built in pop up blocker is great . i don't use it to collect the Brave Awards .. And of course it's a pretty fast browser . ?

Envoy - March 19, 2020, 2:33 pm

I was using Brave but about a month ago moved back to Firefox and I don't regret it.

I used to use Firefox years ago .. What did you not like about Brave ??

de_g3ntl3m4n - March 19, 2020, 2:41 pm

yes feel the the brave browser has been slow, been using mozzolia kinda of

?

I like the anti-tracking etc built in. Also I have mined like 150+ BAT and transferred it into my coinbase.com

This flashed up do you have to to this....Verifying your wallet is optional.

Make sure you go into the settings and set to max ads to the highest. You can also create and run an imacros auto-surf script or find some social media auto surfer to mine coins when your sleeping. I use followlike.net and just put it on auto-youtube viewer. This way you not only earn BAT but also can boost your social media accounts. It's a great method I came up with ;)

Oh for the wallet you have to verify your uphold wallet to get your coins into coinbase, there are other methods to cash out including setting up a brave creator social media account on twitter and donate to yourself, but I think you have to verify it with their robot before you can use them wisely.

duplex - March 19, 2020, 3:20 pm

Actually, I have noticed a bug, when I'm on YouTube, the buttons become non-responsive when I'm watching videos, is anyone getting this?

NP! BAT is at a 50% low now so when it goes back up you will have lots of free crypto pocket change ;)

spiral - March 19, 2020, 3:29 pm

i used brave for like 6 months, but every time I paused a video on youtube and clicked something else at pretty much the same time, it would crash everytime. When I reset my PC I just stuck with edge since its based on chromium now and I really couldn't be bothered with that annoying glitch.

Sick - March 19, 2020, 3:34 pm

Thank you mate yeah i have just set it up .. Should have done it a long time ago .. ?

SoulZeh - March 19, 2020, 4:50 pm

I can actually agree with you too on this, I've used Brave for a long ass time now and it seems to be taking a shit, I really hope I don't have to go back to using chrome, hate that shit.
