Thread: [Is this site sqli vulnerable?](#)

Neff123 - March 20, 2020, 10:23 am

hey, any help is appreciated

site: iskola.cz/

certifa - March 20, 2020, 12:05 pm

With my knowledge is a site sqli vulnerable when it got .php?= in the link

player92 - March 20, 2020, 12:59 pm

no, is not vulnerble to sqli

dwaojowdi - March 20, 2020, 2:48 pm

is there even a possibility in hacking a web like this? if yes how would you hack it?

BigJoe7413 - March 20, 2020, 11:20 pm

Yeah not much on that at a quick glance, Theres host header poisoning on the main domain you'll be able to phish a password reset

Sub domain has server-status open, low level information disclosure

<https://wm2.iskola.cz/server-status>

Not to hijack this thread as I already made one asking somewhat of a similar question but not about SQL, BUT,

Can I ask you a question about another forum/website to see if it's vulnerable ? I can't PM . maybe if you could email me if I gave you one of my emails

player92 - March 21, 2020, 3:39 am

open a new thread with your requests
