Thread: [\[INSTAGRAM BOT\] - Fresh Instagram Bot - Working Without API - DAILY UPDATES!](#)

This Instagram Bot does not use any API and is, therefore, safe to use. I have used it daily for over a month now and with safe rate limits, you won't even get an action block. It's written in python using selenium and simulates real user behavior similar to NinjaGram.

GIVE SOME FEEDBACK

Feature List:

- Watch set amount of Stories from feed
- Browser is muted for story watching
- Custom limit on stories being watched

- Follow set amount of user suggestions
- follows IG user suggestions with a random delay

- Like recent posts from a certain hashtag
- Detects if post already got liked by user
- Custom limit on media's being liked
- If media gets and error whilst loading bot skips the media

- Comment on recent posts from a certain hashtag
- Detects if post already got commented by user
- Custom limit on media's being commented
- If media gets and error whilst loading bot skips the media
