Thread: [How to find SQLi vulnerable websites?](#)

boi1216 - March 21, 2020, 5:51 am

Is there any technique to find SQLi vulnerable websites related to specific topics? For example I if I wanted to find vulnerable websites related to minecraft.. How would I do that?

there are multiple ways but the most effective way is typing your own search query 'Google Dork' an example for it

PHP Code

```
<?php
```

```
minecraft skins inurl:product.php?id=
```

You could use uniscan with the "-i" parameter followed by your dork to mass scan for SQL injection vulnerable sites.
