Thread: [E-Whoring - Payment methods](#)

mamba0420 - March 24, 2020, 9:25 am

Hi everyone. I have been in E-whoring for quite a while now.. and one thing that frustrates me is getting cash into my pocket (cashing at ATM in my hometown(Europe)).

I'm currently using Fake Canadian Paypal (verified with a number through textverified). Afterward, I am sending the money to my original Paypal account, and withdrawing it to my bank account. I know, it sucks, every time I get a new purchase the payment is put on hold and I must wait a week, sometimes two.

Can someone teach me a new method? Or tell me is there anything better? I've heard of CashApp so far, but its untrustable for me, don't know why - try to change my mind.

If there is any other European users E-whoring can you share with me your payment methods? Venmo, Skrill, Paysera, Paysend, are any of these possible in Europe?

Thanks!

If you still need this add me on discord Kotton#6737

KushBlowin - March 24, 2020, 10:19 pm

Cashapp. You need a US verified account so you can cash out to btc.

Take Amazon Gift Cards as payment and convert to BTC/PP or use them yourself.
