Thread: [Hackman Major Update? Covid-19 vaccine, Buffs, new Recipes!](#)

Mr Kewl - March 25, 2020, 11:14 pm

HF!

I just saw a Hackuman being down and looked like [Xerotic](#) was working on something, I see few exciting updates.

[1\) COVID-19-HUM Research](#)

The research is almost done. That means your infected human can be cured.

The Cure can be found in [The Shop](#) and is currently priced at 50 bytes! It was 1000 yesterday! Apparently more the research the cheaper the vaccine becomes and has more probability to cure your hackuman.

2) Layout

The number of moves left is shown.
Also, something called "Buff" is added.

3) New Recipes

I think recipes #4, #5, #6 are new.

4) Recipe Power?

There's something called recipe power which is based on number of posts, I'm not entirely sure what this mean.

If you notice any more changes do post, and if you can know what "Buffs" are, or what "power" is in the recipe do reply.

w0w, now the COVID-19-HUM Vaccine costs 50 bytes darn,

I purchase the same for 1000bytes and lost my sapphire egg'd monster the same day.

Should have had waited for research as it died anyway!

Yeah, even I was gonna buy the vaccine yesterday but a the research continues the vaccine becomes cheaper.

Why are my first few hits stronger and then they get weaker as I keep attacking.

How do I improve this?

How do I improve this?

I want to know this as well as whats the best way to regain moves fast? Or do you just have to wait for them to replenish?

And is the best way to level up just attacking?

I'm not even asking about regaining moves.

I started attacking a level 5, my first few hits were 0.2-0.25 damage.

Then after a few hits from all of my hackumans, the damage dropped to 0.01-0.02 each hit. Weird.

I think you just have to wait I currently have 150 moves a day.

I think the best way to level up attacking is to level up your hackuman as of now.

I'm noticing the same thing, I believe its because your sword icon thing is your attack strength and it regenerates over time
