Thread: [Hackuman Graphics](#)

Xerotic - March 26, 2020, 3:50 pm

Just want to say thanks to [Novica](#) for creating some amazing graphics for the Hackúman game. He created the original monsters/eggs back in 2016 but the assets were never used until we decided to use them this year. And now just today he sent me new icons for the navigation in HUM (Hackúman) that he has been working on. Check them out - <https://hackforums.net/hackuman.php>

These are just 5 new icons. He's got a bunch of other graphics he's already got prepared and that are being touched up to be added to the game. They're going to replace some of the current icons (the food/health/attack/defense) plus icons for yet-unreleased-features. I've seen them. You'll love them. I gave a few sneak peeks but nobody has seen all of the graphics he's created for this yet besides him, me, and Omni.

So big thanks to Novica for making HUM look wonderful.

Let's show him some appreciation: <https://hackforums.net/member.php?action=profile&uid=502172>

Edit: we spent the day also touching up the interface in addition to the new graphics icons. The screenshot from when this thread was posted is outdated now.

MavenGradle - March 26, 2020, 4:57 pm

If only I could find myself one of these elusive hackers in order to have a reason to enjoy these fine icons. Will hackuman eggs be purchasable in the shop by any chance? They shouldn't come cheap though.
