Thread: [\[HELP\] Open Source Casino Script](#)

AuraZone - March 26, 2020, 5:16 pm

Everytime I install an open-source casino script and other shit, it requires linux and a lot of stuff to do. isn't there a simple one, that installs on simple hosting website?
because I got a free domain off freenom and using it on infinityfree hosting.

I won't take my risk with that website.

no need to apologize, casino scripts are most expensive.

True... the funny thing is you can rent there a domain with pre installed script

Yert - March 26, 2020, 5:28 pm

Im looking to create my own legitimate BTC casino.
Right now I am in a partnership with one, who owns 50% of our share, a very live poker app on the App Store which generates income, but we also pay out. We're certified by gaming labs.

I'm more interested in a BTC casino though. Gambling blackjack, and also a bustabit multiplier casino! Contact me with any ideas or help regarding this, I am more than happy to respond!

Bankroll is not a problem.

Bruce Willis - March 26, 2020, 5:29 pm

But i don't know i had contacted him for a while and he sended about 10 times his btc account...?

Bluffer - March 26, 2020, 6:30 pm

What is the script you're trying?

AuraZone - March 26, 2020, 6:31 pm

I tried EZBounty and other crypto currency casinos.
