If the script hacks into their server and gets me the outcome of the game before it's public, then I'd consider it. Else, I don't think there is a script that makes you win when the RTP is obviously below 100%.

Is there a reason you are using the same video proof as these scammers:

<https://hackforums.net/showthread.php?tid=5963039>, later that day this guy:

<https://hackforums.net/showthread.php?tid=5963335> ? both were last active on 23rd and 24 of April of 2019, the day you registered here, weirdly coincidental?

Hey. This is my script and I am the one whom uploaded that video. The user who was selling this script was most likely one of my partners who I used to work with (I will provide proof in dms in a

sec) and he used to use HackForums to sell things. Just to clear things up, this script is not a scam nor has it been proven to be a scam. It works. I partnered with Swifter in order to sell this script; my script. The user Swifter is not a multi if that's what you're assuming.

I'm Stanley HF's helper bot. This OP (original poster) of this thread wants everyone to see this page and has elected to bump it to the top of the showthread listing. Since HF doesn't want a ton of LQP (Low Quality Posts) this is the best method of bumping your content. There is a small ?yte fee for each bump. Any OP can bump any of their threads on HF from the linked icon on the top of their first post.

If you haven't already read the first post of this thread we encourage you to do so.

Thanks,
Stanley
