Adf.ly Clicker

Hello, Well the title itself is already descriptive.

Well before you go down, remember to give me Points.

AdFlyNET.vb

```
Code Imports System.Runtime.InteropServices
Imports Microsoft.Win32
Imports System.Threading
Imports System.Text.RegularExpressions
```

```
<ComVisible(False)>
Public Class AdFlyNET
    Inherits WebBrowser
```

```
    Public Enum CleckerType
        Image = 0
        Button = 1
    End Enum
```

```
    Private tStart As Thread
    Private tmr As System.Windows.Forms.Timer = New System.Windows.Forms.Timer()
```

```
    Private TypeC As CleckerType = CleckerType.Image
```

```
    Public Sub Start(ByVal URL As String, ByVal ClickType As CleckerType)
        TypeC = ClickType
        Me.Url = New Uri(URL)
        AddHandler Me.DocumentCompleted, AddressOf OnDocumentLoaded
    End Sub
```

```
    Public Sub New()
        Dim key As RegistryKey = Registry.CurrentUser.OpenSubKey("SOFTWARE\Microsoft\Internet
Explorer\Main\FeatureControl\FEATURE_BROWSER_EMULATION", True)
        Dim name As String = AppDomain.CurrentDomain.FriendlyName

        If CObj(key.GetValue(name)) Is Nothing Then
            key.SetValue(name, 11001, RegistryValueKind.DWord)
        End If
```

```
Me.ScriptErrorsSuppressed = True
AddHandler tmr.Tick, New System.EventHandler(AddressOf tmr_Tick)
tmr.Interval = 100
```

```
End Sub
```

```
Public Sub WebBrowser_NewWindow(ByVal sender As Object, ByVal e As
System.ComponentModel.CancelEventArgs) Handles Me.NewWindow
    e.Cancel = True
End Sub
```

```
Public Sub OnDocumentLoaded(ByVal sender As Object, ByVal e As
WebBrowserDocumentCompletedEventArgs)
    Try
        tStart = New Thread(New ThreadStart(AddressOf OnCheckerLoad))
        tStart.Start()
    Catch __unusedException1__ As Exception
        tStart.Start()
    End Try
End Sub
```

```
Protected Overridable Sub OnCheckerLoad()
    On Error Resume Next
    Application.DoEvents()
    Thread.Sleep(100)
    Me.BeginInvoke(New MethodInvoker(Function()
        tmr.Enabled = True
    End Function))
End Sub
```

```
Private StartChecker As Boolean = False
```

```
Private Sub tmr_Tick(ByVal sender As Object, ByVal e As EventArgs)
    On Error Resume Next
```

```
    Dim CountStatus As String =
Me.Document.GetElementById("countdown").GetAttribute("innerText")
    Dim CountParse As Integer = Num(CountStatus)
```

```
    If CountParse = 5 Then
        StartChecker = True
    End If
```

```
    If StartChecker = True Then
        If CountParse = 0 Then
            If TypeC = CleckerType.Image Then
                Dim col As HtmlElementCollection
                Dim ele As HtmlElement
```

```
                col = Me.Document.GetElementsByTagName("img")
```

```
                For Each ele In col
                    If ele.GetAttribute("alt") = "Skip Ad" Then
```

```

        ele.InvokeMember("click")
        StartChecker = False
    End If
Next

ElseIf TypeC = CleckerType.Button Then
    For Each hem As HtmlElement In Me.Document.All
        If hem.GetAttribute("id").Contains("skip_bu2tton") Then
            hem.InvokeMember("Click")
            StartChecker = False
        End If
    Next
End If

End If
End If
End Sub

Private Function Num(ByVal value As String) As Integer
    Dim returnVal As String = String.Empty
    Dim collection As MatchCollection = Regex.Matches(value, "\d+")
    For Each m As Match In collection
        returnVal += m.ToString()
    Next
    Return Convert.ToInt32(returnVal)
End Function

```

End Class

It has 2 methods of Clieckeo, Through the Image or Through the Id of the Button.

Method of Use:

Code Dim AdChecker As New AdFlyNET
 AdChecker.Start("http://j.gs/Dqyo", AdFlyNET.CleckerType.Image)
 For those who say it does not work, Well I leave the Image:

Adf.ly Clicker is Actually A Control, More specifically a Modified WebBrowser specially for its function.

If you change the attribute in the Code <ComVisible(False)> to :

Code <ComVisible(True)>
 You can Add the Control Perfectly, and see the Processes they do.

Thanks for reading, and Comment !! ?

How did you got 618 Visits and your account is also safe?
Did you used proxy?

VisualSoft - May 2, 2020, 9:26 pm

I know when you use web-browser we can change user-agent, but is that possible in this control?
Sorry for dumb question, but i have less experience with web-browser stuff.

READ THE RULES AGAIN

Its not against rule, Next do your homework better.
Also if you like My Post broke any hf rules, Just report to staff and dont try to act like a staff.

GreyPhantom - May 4, 2020, 3:32 am

Does it work on RDP? and need to use proxy or not? I don't see you using proxies. You might get banned?

D3ath_GuN - May 4, 2020, 9:50 am

Hi,

Is it possible to have the basic program in open source, thank you.

Krysis - May 5, 2020, 8:59 am

Come back if you've got a payout.
I made something like this a few years ago, where it counted the views. But I eventually got banned from it.
If you must use a browser, take a look at Selenium. It's much better!

EDIT:

"Me.ScriptErrorsSuppressed = True"

A part of adf.ly human verification is using JavaScript. As I can see with this code, you basically ignore JS error with that.

DO NOT use this for adf.ly. It may seem that you are able to get a payout, but you will get banned eventually. Sorry!

VisualSoft - May 5, 2020, 11:16 am

ScriptErrorsSuppressed should just suppress the error/warning msg.

Krysis - May 5, 2020, 11:17 am

(May 5, 2020 11:16 AM)VisualSoft Wrote: [\[CITE\]](#) ScriptErrorsSuppressed should just suppress the _error_/warning msg.

Yes, but web browser is detected due to the way it treats JavaScript

Believe me, I got banned for making a bot around adf.ly a few years back, using the WebBrowser.

Joel - May 6, 2020, 7:10 am

I'd imagine this isn't really good enough to get past Ad.flys security. And as someone else suggested please look into Selenium Web-browser, it will greatly help you with this sort of automation.

And its available in most languages. Python, Js, C#, VB

op is 13 this bot will get your account banned in a hour or 2 used the bot on 3 spare adfly accounts got my account banned with in a hour.

adfly staff are not dull. I know when i was op age i use to think i could "cheat" and earn loads but there not dull :)

They're only job is to monitor human activity its quite obvious they're going to be more than an expert at it. They have a reputation hold up I already knew this shit wouldn't work.

And even if it did it would only make pennies, they can also see where the clicks are being redirected from. If their are literally thousands of direct clicks to the URL its pretty obvious whats going on.

goners - May 10, 2020, 9:50 pm

First off you guys have to understand where adf.ly is getting their money from once you understand that you will understand security methods put in place for bots, proxies, VPNs etc... So with that being said understand you don't only have to bypass adf.ly security you also have to bypass the ad companies security. So sorry OP but all your bot does is click does not change IP addresses does not use proxies can't use VPNs so it's useless and for whoever has a legit adf.ly account DO NOT USE!!!

P.S.

You will be banned upon payout :-(
