Thread: [I am a passionate novice of RAT](#)

Lebanquier02 - March 30, 2020, 3:16 am

I need help to know what are the different tools I would need to succeed in RAT hacking and not be detected if RAT were discovered.

If you have tutorials to help me train it will be really fun. thank you in advance for your help

VPN, VPS, QuasarRAT, Crypter.

Bitcoin. No real details about yourself.

NO-IP is a ddns provider. That one should be avoided.

From all the stuff I mentioned, I only named the RAT, which I recommend - QuasarRAT, since it's free & open-source on Github.
