Thread: [Excel copying data went wrong when recording macro](#)

QU35T - March 30, 2020, 3:33 am

So, I am not familiar with VB at all or Excel, so I'm finding quick help on how to fix this:

<https://gyazo.com/1e2aec67bcef11b707e3591b6c4a8178>

Here is a GIF (I want to automate our job attendance).

So to describe the bad behavior in this GIF: I created 4 buttons that should copy cells, for Example "Add Construsoft" should copy those 3 Construsoft cells and "Add Timber" should copy 2 Timber cells in that sheet, but a there's a problem because "Add Timber" Macro remembers the same cells, so I what I need is that when "Add Construsoft" button is pressed, "Add Timber" button should count with three more cells inserted. Is there any way you can help me out guys?

<https://prnt.sc/rml4zo> (CODE)

Thank you very much.

Damn, I understand your frustration - I work a lot with excel at my job too, and it can be so hard. Sadly I cannot help you myself, but I will try to contact a friend and see if he can!
