Looks nice. Might try it later, but it looks pretty hard to follow for someone like me that is just a beginner. :D Where do you get vectors and add a green photo filter?

Buzz Lightyear - August 12, 2010, 7:21 am

The vectors, you just find, there is no one specific one. And a green photo filter is under adjustments

Onyx - August 12, 2010, 7:22 am

Very nice work Buzz. Great tutorial.

Alright I know how to do photo filters now. Do you have to download vectors and load them like a pattern or something or are they just like c4d's?

Buzz Lightyear - August 12, 2010, 7:28 am

like c4ds. they are images

Good job Buzz, keep it up.

Protoshadow - August 12, 2010, 8:20 am

Nice tutorial, appreciated :) I liked light effects you made

SJ3|X.Maniac - August 12, 2010, 11:17 am

Not beginner friendly. At least you could have explained the detail every bit. Like where to download the files

Buzz Lightyear - August 12, 2010, 12:21 pm

I couldn't do it file for file. That is hard to do. Use some creativity. I never intended people to copy this picture for picture. It's just meant to show how it was done. Try finding some c4d's on deviantart, and other things. You can get great ones from Stinky666.

i tried it but messed up.
too hard for me... :(

I don't know what a C4D or a stock means... Can someone tell me?

BguyTheKing - August 13, 2010, 4:27 am

not very detailed. beginners wont get it easily

Buzz Lightyear - August 13, 2010, 5:59 am

It's not supposed to be for beginners. It's meant for showing people new techniques with photoshop. And just google what a C4D and a stock is. Not that diffucult

Ally Mac - August 13, 2010, 1:50 pm

Awesome tutorial! Thank you. ?
