Personally i have used Code Protector when it was first on the market and it was a wonderful product.

prtymans - July 29, 2020, 9:42 pm

I used byte crypter. Honestly not worth it. It's not fud.

SIM-3281006 - July 30, 2020, 9:10 am

what about now?

(Jul 29, 2020 09:42 PM)prtymans Wrote: [\[CITE\]](#) I used byte crypter. Honestly not worth it. It's not fud.

thanks, private or public?

darkaoui95 - July 30, 2020, 9:22 am

Don't use any crypter here who is public if you want a good result , because no one public can bypass the cloud of WD/Avast/AVG ect..

Buy private crypt it cost more but u can get what u're looking for

Freak_OG - July 31, 2020, 12:49 am

I am selling private crypts for cheap (dm me for info), never use a public crypter they have extremely short fud time and use well known methods of running your EXE. (eg, runpe from resources)

SIM-3281006 - July 31, 2020, 10:18 am

Ok, send me PM.

Narnia - July 31, 2020, 2:26 pm

dont buy public crypters

SIM-3281006 - August 1, 2020, 1:37 pm

(Jul 31, 2020 02:26 PM)Nara Wrote: [\[CITE\]](#) dont buy public crypters
yes, private is better

Kindness - August 9, 2020, 9:37 am

When you get a good crypter please,inform me .I am also searching a good crypter.
kind regards

No but discord

alinalat - February 11, 2022, 4:55 am

Worst crypter in the market, it use ResHacker for modify your file and your soft damage after crypt.
Coder not say any, have not refund no more
Not recommend it, you will lose your money

Demoralise - February 12, 2022, 2:44 am

None of those crypters are good. CyberSeal is dead for starters (it was shutdown and the developer

was charged) thankfully user info was stored in a way that it was permanently deleted upon the developer getting caught so no users were raided or anything as a result of that. ByteCrypter has been around forever and has been subpar for a long time in terms of FUD rates. Jana Crypter and Code Protector are just mediocre and nothing noteworthy.

Given how nearly all projects on HF get shut down at some point and the ramifications that could have on you alongside it being much more affordable in the long term to pay a developer to make a crypter for you to your exact requirements alongside being able to pay them to teach you how to reFUD it - I'd say that is a much better option. Also because it is a private transaction there won't be any legal ramifications either

You can try to look on russian forums if you want better crypts, Any public crypter on here will not be fud because it is used by 100s of users and they just aren't quality. From what i hear raz crypts will be the best on hf but you will have to wait.

SIM-3281006 - February 16, 2022, 10:24 pm

what's your suggestion here?

crackavaly - March 21, 2022, 3:51 pm

I used Jana crypt the privat stub but its crap dont buy it he shares the stubs so its just a few hours fud. He has 3 scam threads opend actually... Now i use the esco.pw crypter privat stub and im realy happy with it. i also use the exploit from esco its the only product i found until now whats worth the money.
