Thread: [\[SHOP\] Unlimited Shared Google Drive \\$10 Autobuy!](#)

Brebro - March 31, 2020, 12:53 am

This is a Google drive, with unlimited storage, that is shared to a Google Email of your choice. That's it!

How to use:

Buy a code from [here](#).

Go to [my Discord Server](#) and create a ticket in #ticket-creation channel.

Paste the code you got from the email into the new ticket you created.

Enter the Google Email that you would like the drive linked to.

Wait for the drive to be added (shouldn't take more than 5 minutes).

If you have any questions don't be afraid to join my discord and ask (that would be the best way to contact me). If you would like to pm me on here that would be fine as well!

I mean that you can access it through drive[WARNING POSSIBLY INFECTED]google.com/drive/u/0/shared-drives. Only you (and google of course) have access to the drives, but you can add and remove people from it as you like. The thing that makes it special is it is not made with a .edu email making it extremely improbable to get removed by google (meaning it has never happened since the shop opened).
